

Doug DeHart – Retired Fisheries Chief, ODFW and retired senior fishery biologist, USFWS

Longer –

Douglas DeHart is the principal of Coffee Creek Bioscience, a small biological consulting firm. He has a B.S. in Biology from Harvard University, M.S. in Fisheries from Oregon State University, and Ph.D. in Fisheries from the University of Washington. He has 35 years of state and federal fishery agency experience, much of that in the Columbia Basin. He has planned and directed fishery research projects, overseen hatchery and habitat restoration programs, and been involved in the conduct of a broad range of fishery management and planning activities. Previous positions have included fishery research coordinator for the Corps of Engineers Portland District, Bioengineering Chief for National Marine Fisheries Service Northwest Region, Chief of Fisheries for Oregon Department of Fish and Wildlife, and senior fishery biologist in the Pacific Regional Office of the USFWS. He has special expertise in the area of fish passage including design, operation, and evaluation of passage and screening facilities.
